Career Objective

I am a passionate and detail-oriented **Front-End Developer** with hands-on experience in creating secure, scalable, and visually appealing web applications. My goal is to continually enhance my skills, transition into a proficient full-stack developer, and contribute to impactful projects in dynamic and collaborative team environments.

Skills

Front-End: HTML | CSS | Tailwind CSS | JavaScript | React.js | Next.js | TypeScript | Redux

Back-End: Node.js | Express.js | MongoDB | Mongoose

Tools & Technologies: Firebase | Git | VS Code | GitHub | Vercel | Netlify | Postman | Figma

Projects

1. LivingNest: Smart Apartment Rentals

🔗 [Live Link](#) | [Client Code](#) | [Server Code](#)

Features:

- Admin dashboard manages apartment listings, rental agreements, and member access.
- Member dashboard lets members securely pay and view payment history for transparency.
- Secure authentication with Google Login and JWT-protected routes for added security.

Technologies used: Tailwind CSS, React.js, Node.js, Express.js, MongoDB, Firebase, JWT

2. CarePoint - Volunteer Management Platform

🔗 [Live Link](#) | [Client Code](#) | [Server Code](#)

Features:

- Secure user registration and login with JWT-based authentication for protected routes.
- Logged-in users can manage volunteer opportunities by creating, updating, and deleting them.
- Efficient CRUD operations to manage volunteer activities with easy search functionality

Technologies used: Tailwind CSS, React.js, Node.js, Express.js, MongoDB, Firebase, JWT

3. GameScope - Game Review Platform

🔗 [Live Link](#) | [Client Code](#) | [Server Code](#)

Features:

- Users can save and manage their favorite games in a dedicated watchlist for easy access.
- Users can securely register and log in with JWT-protected routes, ensuring data privacy.
- Easily find games based on preferences using intuitive sorting and filtering options.

Technologies used: Tailwind CSS, React.js, Node.js, Express.js, MongoDB, Firebase, JWT
